The course statistics, for those interested in facts and figures:

Time in development, construction:	18 months
Number of CRZ files:	126
Total Files Size:	2.65G
Final CRZ File:	34.6Mb
Verts:	72,756
Faces:	144,720
2d Objects:	1,067,904
3d Objects:	2,301
Mappings:	1,092
Textures:	20

I have every CRZ file and my original hand sketches on paper, saved onto CD. I did this because with so many bugs that cause the crashes in the APCD, I did not want to see 18 months of work go down the drain ☺.

I wish to acknowledge the following for their contributions along the path of development.

Simon Kent (aka Simon) - for his feedback on very early alpha's of the course.

Mike Jones (aka MikeJ) - for the provision of some Textures and help, and also with his thoughts and suggestions on the Alpha and Beta releases. Big thanks Mike.

Thomas Davidson (aka Tdave)— for his extraordinary efforts on the Alpha release. He really went to some effort, far beyond what most testers do, playing some 80+ rounds on the course, and even produced the Hole Handicaps from his efforts.

There are numerous others who helped beta test this course, and I thank everyone, you know who you are ☺

François CRISTALLO (aka LeWaW)

I am indebted to you for the Hole Previews my friend.

In this Readme, I have included every pin position on each green. I didn't wish to clutter the Hole Previews so they are in this document, which can be printed out for reference to during a game, or for setting Custom Pins. They also show the slopes and fall off.

The scorecards are listed below, and, yes there are only 2 Par 3's on Brookdale Country Club. Brookdale Country Club is a fictional design set in the Australian country side. The plantings are typical of country Victoria.
