

COMPREHENSIVE PGA PHOTOS

NOTES

1. This zip file contains 1,056 photos of the golfers appearing in the following PGA Tour.com tour directories:

PGA Champions Tour Player Directory.
PGA Tour Player Directory.
PGA web.com Player Directory

If a player is listed in multiple directories, their photo is included only one in this collection.

2. For unknown reasons, there are players that have profiles in the PGA Tour.com website but are not listed in the directories. Don't ask why, because I have no idea. This was discovered when researching for players that were on either the Tour Scoring Average Statistic List or the Tour Money Leaders List. Some of these photos are included in this file.
3. In some cases, players may have a PGA Tour.com profile page that does not include their photo. Where possible, I did an internet search attempting to locate a suitable photo for editing and inclusion in this collection. I found many, but there are 19 players for which a suitable photo for editing was not available. In those cases, I included a "placeholder" photo. Maybe some day, I'll find an appropriate photo.

4. You can add these photos to, **C:\ProgramData\Links 2003\Players** for use with Links 2003. This file in all likelihood is a "hidden file". You will have to "unhide" the files in Windows Explorer. This is done by going to Tools/Folder Options/View/Files and Folders/Hidden Files and Folders and clicking the button "show hidden files, folders and drives".
- 5, **CAUTION: embedding these photos into an existing Career Mode Roster results in the start of a new career. In other words, your previous career, if any, is lost.**

I undertook this project because I kept finding myself constantly looking for photos as I added computer opponents or created rosters. I finally said to myself, "Self, why not just gather what you need in one shot instead of piecemeal?"

So now you know, I am crazy but I hope that some of you will download and enjoy their use.

Richard F. Thomas
